SUMMARY

Motivated and skilled **Full-Stack Software Engineer** with hands-on experience in developing modern web applications using **Flask, React, JavaScript, Python, HTML, TailwindCSS, and Bootstrap**. Strong in **problem-solving** and **end-to-end development**, with a passion for building efficient, scalable, and user-friendly solutions. Completed two full projects during my academic journey and gained **six months of practical experience at Moringa School**, where I sharpened my technical and soft skills, including **project management** and team collaboration. Currently seeking **job opportunities, internships, or freelance roles** where I can contribute to impactful projects and continue growing as a software developer.

SKILLS

- Python
- Javascript
- React
- Tailwind
- Git
- flask
- Project management
- Problem solving

Projects

Fashion design - <https://fashion-designed-frontend.vercel.app/>

Project Description

 Fashion E-Commerce full stack

Fashion E-Commerce Website. Built with Flask ,React,Python, Tailwind Css and SQLAlchemy, it provides secure REST APIs for user management, products, categories, orders, invoices, and role-based authentication using JWT.

<https://ambulance-app-b741.onrender.com/home>

Project Description

This project is an Ambulance Request App that connects patients with nearby hospitals during emergencies. Built with React for the frontend and Flask/SQLAlchemy for the backend, the application allows users to request ambulances through a map-based interface, track their ambulance in real-time, and choose between payment options. Hospitals can receive and manage incoming requests through a dedicated dashboard.

EDUCATION

Primary school

Iftin Primary School

2011-2019

High school

Garissa Academy Highschool

2019-2022

Certificates in software engineering moringa school

Engaged in intensive training covering key programming languages and frameworks, fostering proficiency in front-end and backend development

2024-2025
